About This Game

KTBL-Der Milchbauer (Dairy Farmer) is a playful simulation in which the player is responsible for a farm with dairy cattle. The aim is to keep the farm in good condition for over 20 years by clever farming, feeding and milking the cows, buying and selling, controlling the milk production and much more.

What Is Special About Milchbauer?

The Game Is Based On Realistic Data and Facts.

KTBL collects data about agriculture for almost 100 years.

Our aim is to provide farmers information concerning their economic planning.

Milchbauer is based on KTBL databases.

You are playing with data and economic conditions which reflect a part of the reality in agriculture.

You can edit the data and you can run through various scenarios, e.g. the consequences of changing milk prices.

If you need to speed up your carpal tunnels inflammation, this game is your best choice. Buying 300 cows => clicking 300times (+), no +5 , +10, mark with shift etc... If you want to inseminate the 300 cows you have to click 300times, but also need to scroll in slowly reacting list. The worst GUI execution is dragging this game completely down. And with the real economic data, well I am not really sure. Its better to buy the cows and sell them when they stop milking and buy new ones, than to inseminate them. Does not sound reallistic to me.
